Charlotte, NC, March 6, 2013 – **Radiator Specialty Company** (RSC) announced that it has entered into an exclusive distribution agreement with Sorbent Green, LLC, makers of **GreenSorb®**, an environmentally friendly absorbent that makes the management and disposal of fluid spills safe and easy. The agreement will directly benefit RSC and its sister company, **RSC Bio Solutions**, by bolstering their reputation as leading providers of innovative biobased solutions for industrial and automotive customers who are focused on performance without tradeoffs – ensuring the safety of their employees and the environment.

RSC Bio Solutions manufactures and distributes high-performance cleaning, degreasing and lubricating products that are safe, non-hazardous and environmentally responsible. GreenSorb products are effective for cleaning up industrial fluids such as hydraulic oils, lubricants, solvents, acids, greases, and brings significant health benefits to professionals who commonly use dusty products to manage chemical spills. The unique absorbency and encapsulating properties of GreenSorb help to reduce costs by lowering the amount of absorbent material required for disposal after spill cleanups.

“RSC’s agreement to become the sole industrial and automotive distributor of GreenSorb is a natural complement to our innovative, biobased product lines,” said Mike Guggenheimer, Vice President of Business Development for RSC Bio Solutions. “We recognized GreenSorb as a unique solution for fleet managers, marine vessel operators and automotive professionals and we’re excited to bring further value to our customers by adding these environmentally safe and effective absorbents to our full offering of high-performance biobased cleaners, degreasers and hydraulic fluids.”

“Sorbent Green is committed to providing pioneering solutions to help address the growing environmental concerns of our customers,” said Tom Uskup, President of Sorbent Green. “Our partnership with RSC Bio Solutions gives us the ability to expand into new markets, and maintain our steadfast pledge to help provide our customers with ecologically responsible and efficient tools to manage their spills and hazardous waste.”

About Radiator Specialty Company

Headquartered in North Carolina for 88 years, RSC is a leading producer of lubricants, chemicals and additives for the automotive, hardware, industrial, appliance and export markets. RSC is well known for its trademarked consumer brands, Liquid Wrench®, GUNK®, MotorMedic® and TiteSeal®. RSC-branded products are sold worldwide in over 80 countries. For more information, visit www.RSCBrands.com.

About RSC Bio Solutions, LLC

Established in 2010 and headquartered in North Carolina, RSC Bio Solutions is a sister corporation to Radiator Specialty Company (RSC) focused on providing high performance chemistries that are safe, non-hazardous and environmentally responsible. To expand its offerings further, RSC Bio Solutions' parent company, Blumenthal Holdings, recently acquired a controlling interest in partner Terresolve Technologies and its ENVIROLOGIC product lines, including readily biodegradable functional fluids and gear oils that are tested and proven in some of the toughest environments possible. For more information, visit www.rscbio.com.

About GreenSorb®

GreenSorb is eco-friendly, multi-purpose absorbent that is more effective on more types of spills than competing absorbent products. For more information, visit www.GreenSorb.com or follow us at www.facebook.com/GreenSorb.
